

Draft EIS - Appendix B

APPENDIX B

SPECIAL STATUS SPECIES

This appendix, BLM's most current list of special status species in the western States, includes species listed under the Endangered Species Act (ESA) as endangered, threatened, candidate, and proposed, as well as BLM-sensitive species. Because of the length of the list, rather than print it with this DEIS, an online link located at <http://www.blm.gov/planning/library/GrazingEIS/SSS.htm> can be viewed or by call Molly Brady at 202-245-7714 for a hardcopy.

While this list is BLM's most up-to-date list of special status species, the list may change at any time according to changes in the listing by the Fish and Wildlife Service; more recent data from recent investigations; and further verification of a species presence on public lands.
